### Construction continues this winter on I-5 in Shoreline; drive carefully through the work zone

Winter weather can slow down construction, but we're still working through the dark, cold months. This winter WSDOT crews continue construction on [I-5 between 175<sup>th</sup> and 205<sup>th</sup> streets](#) in Shoreline. While crews work to make your commute better, help keep them and yourself safe by being extra cautious when driving through the work zone. Winter conditions can further complicate driving, especially through construction zones, so please use an even greater amount of caution over the next couple of months as you drive on I-5 through Shoreline.

Following our [winter driving tips](#) will help ensure that you safely make it to your destination.

- Adjust your speed according to conditions
- Avoid changing lanes
- Minimize distractions
- Allow plenty of following distance
- Use your headlights

### WSDOT crews busy battling Mother Nature

Additional rain and snowfall over the weekend kept WSDOT crews busy here in King County and other parts of the state. We are gearing up for more activity as wet soil conditions and continuing rainfall are likely to result in additional landslides over the next several days. Currently, several roads are closed or affected by snow.

For the most recent updates about highway closures, avalanche control and status of roadway conditions resulting from winter weather, please visit our [Highway Weather Impacts page](#). This site is updated daily, or as conditions change.
